Speakers

Prof. Martin Taphoorn MD PhD
Leiden University

Martin Taphoorn obtained his MD at Leiden University and subsequently specialized in clinical neurology in Amsterdam VU Medical Center, where he also wrote his PhD thesis "Treatment of Primary and Metastatic Brain Tumours; Beneficial and Adverse Effects". He further specialised in clinical neuro-oncology at University Medical Center, Utrecht and during a sabbatical leave visited MD Anderson Cancer Center, Houston Texas (Dr Levin) and Memorial Sloan-Kettering Cancer Center, New York (Dr DeAngelis).

Dr Ben Kong BSc(Hons), MBBS, PhD, FRACP
Medical Oncologist – Prince of Wales Hospital, NHMRC Clinical Trials Centre, UNSW

Ben Kong is a medical oncologist and cancer researcher with interests in clinical trials, immuno-oncology and translational research. He trained in General Medicine at Concord Hospital and Medical Oncology at Westmead Hospital. In addition to his clinical duties, Ben is currently an Oncology Research Fellow with the Co-Operative Group for Neuro-Oncology at the NHMRC Clinical Trials Centre and a Senior Research Fellow with the SPHERE Cancer Clinical Academic Group at UNSW.

Prof. Matthew D. Dun PhD
The University of Newcastle (UON)

Professor Matt Dun is a National Health and Medical Research Council (NHMRC) Emerging Leadership Fellow (2020-2024) and a Defeat DIPG Chadtough New Investigator (2020-2021). Matt is a medical biochemist and Professor of Paediatric Haematology and Oncology Research the University of Newcastle, Australia, and a Deputy Director of the HMRI Precision Medicine Research Program. His position and research has been supported by state and/or national funding bodies continuously since 2012, as well as supplemented by philanthropic and industry contributors throughout.

Dr Sarah Bray
Project Manager – Brain Tumours Online at University of Melbourne

Dr Sarah Bray is an experienced research project manager and consumer engagement coordinator, passionate about science engagement with the wider community and using her research and communication skills to achieve a better, more equitable, sustainable and healthier world. Sarah has thrived on working in a diverse range of projects over her career, from her PhD project wrangling ancient DNA from extinct bears, to medical research in cancer biology, and more recently, managing a national 'Big Data' project linking the health and aged care sectors in Australia.

Peter Ramstadius
Website Coordinator and Helpline – Brain Tumour Alliance Australia (BTAA)

Peter is a semi-retired civil engineer from Coffs Harbour. He has enjoyed a varied career specialising in construction project management for both government and the private sector, but more recently in a self-employed role working in the mining industry. Peter became involved in the brain tumour community when his wife, Jenelle developed a GBM and passed away in 2017 after a 20-month battle. Jenelle had an unrelated meningioma removed a few years earlier.

David Hewitt
Manager School Relations & Seeking Equanimity – Mindful Meditation Australia

David is a dedicated professional at Mindful Meditation Australia, specialising in building connections with schools and non-education organizations to facilitate the integration of mindfulness practices. With a focus on enhancing workplace culture, relationships, and personal well-being, David plays a pivotal role in inspiring positive transformations.
